# **1 Introduction**

## **1.1 Background**

Amendments to the *Rural Fires Act 1997 (the Act)* enacted in 2017 introduced a new legislative basis for the establishment and maintenance of an enhanced fire trail network in NSW. The amended Act enshrines fire trail management into the existing bush fire management planning process and puts in place a range of new powers, processes and obligations to plan, identify, provide and maintain fire trails across the State.

## **1.2 Aim and Objectives**

The aim of the Fire Access and Fire Trail Plan is to provide schemes for appropriate means of accessing land to prevent, fight, manage or contain bush fires, and in particular may do so by identifying or providing for the identification of suitable existing or proposed fire trails" (S54A *Rural Fires Amendment Act 2016*).

# **2 Relationship to other Section 52 Plans**

Like Bush Fire Risk Management Plans and Operations Plans, Fire Access and Fire Trail (FAFT) Plans are prepared by BFMCs under Section 52 of the *Rural Fires Act 1997* and should reflect each other. However, where there are inconsistencies between this FAFT Plan and the Bush Fire Risk Management Plan, this FAFT Plan prevails in accordance with Section 59A of the *Rural Fires Act 1997*.

In order to streamline bush fire risk planning, preparation of future Bush Fire Risk Management Plans may occur concurrently.

# **3 Existing Fire Trail Network**

The existing fire trail network was utilised as a basis for identifying the strategic, tactical and other tracks within the landscape.

# **4 Proposed Fire Trail Network**

The BFMC gave consideration to the following factors when preparing this FAFT Plan:

- Topography
- Vegetation
- Fire History
- Public road network
- Linkages to Fire Trail and public road networks
- Historic ignition history
- Operational value
- Wilderness areas
- Native Title Claims
- Aboriginal Land Claims
- Threatened species
- Threatened ecological communities
- World Heritage Areas
- Climate
- Fire Season

- Prevailing or dominant winds
- Known fire paths
- Fire frequency
- Land use
- Tenure (Private Land)
- Alternate fire suppression strategies
- Ability to provide operational support
- Suitability of terrain for construction
- Fire Trail importance to the BFMC
- Fire trails which extend into neighbouring BFMCs

## 5 Schedule of Identified Fire Trails

The *Fire Trail Standards* state that a FAFT Plan shall have a Schedule of Identified Fire Trails which must detail the following:

- Name
- Identifier
- Category (strategic or tactical)
- Status (registered, designated etc.)
- Vehicle Carrying Capacity (VCC)
- Proposed fire trails
- Current fire trail condition
- Responsible agency; and
- Other matters as determined by the NSW RFS Commissioner.
