

Bush Fire Preparation Map

Terrey Hills / Duffys Forest

WORKS PROGRAM

Map Ref No.	Treatment Ref No. in RFSAP	Strategy	Priority in RFSAP	Action	Responsible Agency	Scheduled Action Date
1	84	Hazard Reduction	1C	Inspect APZ and treat as determined.	DECCW/ Private	2012/2013
2	40	Hazard Reduction	1A (Extreme)	Inspect APZ and treat as determined.	DECCW/ Private	2012/2013
3	99	Hazard Reduction	2A	Inspect APZ and treat as determined.	LPMA/ LGA/ Private	2012/2013
4	2	Hazard Reduction	1C	Inspect and clear around major pipelines as determined by Sydney Water.	Sydney Water	Annual
5	1	Hazard Reduction	1A (Extreme); 2A; 1C;	Develop Annual Implement RFS Mosaic Burning Program.	LPMA/ LGA/ DECCW/ NSWFB/ Private/ RFS/ Other	Annual
6	11	Preparedness	1A; 1C	Inspect & Maintain Fire Trails	LPMA/ LGA/ DECCW/ RFS	Annual
7	114	Hazard Reduction	9B	Inspect APZ and treat as determined.	Private	2013/2014
8	93	Hazard Reduction	1C	Inspect APZ and treat as determined.	LPMA/ LGA/ DECCW/ RFS	Annual
9	61	Hazard Reduction	1A (Extreme)	Inspect APZ and treat as determined.	Private	2012/2013
10	16	Hazard Reduction	1A (Extreme)	Inspect APZ and treat as determined.	DECCW/ Private	2013/2012
11	38	Hazard Reduction	1A (Extreme)	Inspect APZ and treat as determined.	LPMA/ LGA/ DECCW/ Private	2013/12

Is your property fire-safe?

1. Cut back any overhanging trees or shrubs and dispose of cuttings appropriately.
2. Check the condition of your roof and replace any damaged or missing tiles.
3. Clean leaves from the roof, gutters and downpipes and fit quality metal roof guards.
4. Non-combustible fences are the most effective at withstanding the intense heat generated by bush fire.
5. Plant trees and shrubs that are less likely to ignite due to their low oil content.
6. If you have a water tank, dam or swimming pool, consider installing a Static Water Supply sign (SWD).
7. Ensure auto floor coverings.
8. Store wood piles well away from the house and keep covered.
9. Keep garden much away from the house and keep grass short.
10. Make sure the pressure relief valves on LPG cylinders face outward.
11. Ensure you have a hose which is long enough to reach every part of the home.
12. Remove and store any flammable items away from the house.
13. Install metal fly-wire or acid screens to the outside windows and doors.
14. Have a non-combustible doormat.

Zone	Purpose	Suppression Objectives	Zone Characteristics
Asset Protection Zone	To protect human life, property and highly valued public assets and values.	To enable the safe use of Direct Attack suppression strategies within the zone. To minimise bush fire impacts on undefendable assets.	As per RFS document Standards for Asset Protection Zones.
Strategic Fire Advantage Zone	To provide strategic areas of fire protection advantage which will reduce the speed and intensity of bush fires, and reduce the potential for spot fire development. To act containment of fires to existing management boundaries.	To improve the likelihood and safe use of Parallel Attack suppression strategies within the zone, and/or indirect Attack (back burning) in high to very high fire weather conditions, within the zone. The likelihood of bush development within the zone and/or spot the ignites potential from the zone.	Zone width related to suppression objectives and dependent upon Topography Aspect Slopping propensity Adjacent pattern of treatment Access to critical fuel hazard (CPH) once established. Management practices should aim to achieve mosaic fuel reduction patterns so that the majority of the SFAZ has an CPH of less than high.
Residential Preparation Zone	To identify that residents have a role to play in bush fire risk management and that they are responsible for their own property preparedness.	To increase the preparedness of residents for bush fire and ensure that vegetation in the zone is adequately maintained. To provide a defensible space for residents. Fire fighters and competent hazard reduction workers carried out within Asset Protection Zones / Strategic Fire Advantage Zones.	Residents should strive to achieve a 'Fire Safe' property as outlined in the illustrations above. Neighbouring properties should be treated with the NSW Rural Fire Service.

LEGEND

- Proposed Asset Protection Zone
- Proposed Strategic Fire Advantage Zone

PRODUCTION INFORMATION

Base Data: LPMA Cadastre and Topo Database
 Map Projection: GCS GDA 1984
 Print Date / Time: 26/08/2012
 Produced by: Sarah Kemble
 1 grid square = 1 km² (1000m²)

WARNING INFORMATION

1. This map has been prepared by the NSW Rural Fire Service ('The Service') using data supplied to it by other agencies and entities. See the 'Data Dictionary' for further information about the sources of this data.
2. The Service has not verified or checked the data used to prepare this map. The map may contain errors and omissions. The Service has not made any attempt to ground truth the map.
3. There will be a margin of error in relation to the location of features recorded on the map. The Service is unable to specify the extent or magnitude of that margin of error.
4. Significant changes may have occurred.
 - i. In the time between which the data was originally collected and the map produced, and
 - ii. Since the map was produced.
5. Users must, wherever possible, ground truth the map before relying on it or the accuracy of the map or the information recorded on the map for any purpose.
6. The Service accepts no responsibility for any injury loss or damage arising from the use of this map or any errors or omissions in the information recorded on the map.
